Yash Anil Channe

Product-minded Customer Success Manager | Shipped product work on a live SaaS platform

Montreal, QC | 428-927-8901 | yasshhc9@gmail.com | yashchanne.com | linkedin.com/in/yash-a-channe | github.com/yasshhc

SUMMARY

Customer Success Manager with an engineering background who already does product work. Authored **140+ product tickets** across a live municipal SaaS platform (**50+** resolved or shipped), including full refinement specs, structured AI feature evaluations, and permission design questions. Voice of **100+ public-sector clients** to Product and Engineering (**CAD 1M+ ARR**, **98% YoY retention**). Builds tools and live web products with Python, SQL, and Claude.

KEY ACHIEVEMENTS

- Authored **140+ product tickets** (bugs, feature requests, refinements, test cases) across **13+ modules** of Citylogix's live platform, drawn from 35 client accounts; **50+** resolved or shipped.
- Wrote the full specification for editing a logged repair date: backend, frontend, audit log behaviour, and **8 edge-case tests**. Shipped in the June 2026 release.
- Ran a 20-query structured evaluation of the AI Search feature with pass and fail logging. Found a silent case-sensitivity defect that returned wrong answers; fix shipped May 2026.
- Scoped project-level cost allocation for Bulk Log Events from a **$948K** multi-segment client invoice, written as a purely additive change. Shipped September 2026.

EXPERIENCE

Customer Success Manager, Citylogix Inc
Montreal, Canada | Sept 2025 - Present

- Voice of **100+ public-sector clients** to Product and Engineering. Turn client needs into feature requirements and user stories in Jira.
- Partnered with Product and Engineering to launch the Bulk Log Events tool. Improved adoption across multiple municipalities.
- Lead UAT on bug fixes and new releases, including RBAC and permission testing. Validate with clients before rollout. Join Agile ceremonies to align priorities with client impact.
- Manage the full client lifecycle: onboarding, training, QBRs, renewals. **98% YoY retention** across **CAD 1M+ ARR**.
- Delivered **35+ SaaS implementations**. Cut average go-live time from **6 to 4 weeks**.

Project Coordinator, Citylogix Inc
Montreal, Canada | Jun 2024 - Aug 2025

- Coordinated project lifecycles using Salesforce and Asana. Boosted task throughput **~10%**.
- Managed project budgets over **CAD 500K**. Processed change orders. Kept delivery on time and in scope.
- Standardized documentation (RFIs, POs, COs). Cut setup time **~15%**.

Assistant Department Manager, Provigo Le Marche
Montreal, Canada | May 2023 - Jun 2024

- Led a food waste reduction initiative. Cut waste **~10%**.
- Led a 12-person team. Reduced turnover **~5%** through coaching.
- Optimized inventory and merchandising. Lifted high-margin sales **~8%**.

Junior Engineer MEP, Scon Projects Private Limited
India | Aug 2021 - Jul 2022

- Prepared technical documentation and compliance logs across **30+ sites**.
- Supported process improvements. Reduced rework **~12%**.

PROJECTS

CRSCal (CRS Calculator) | Built with Claude
Oct 2026

- Shipped a live Express Entry (CRS) score calculator that compares the old and new Nov 2026 rules (crscal.yashchanne.com).

- Reached **3,809 visitors** and **43,248 page views** in **30 days** (Oct to Nov 2026), with a **25% bounce rate**.
- Built and tested the scoring rules before any screens, with **132 automated tests** that run before every update.

Bill Splitter | Built with Claude Mar 2026 - Oct 2026

- Shipped a live bill-splitting web app that reads receipts with AI (billsplitter.yashchanne.com). **450+ bills split**.
- Fixed a rounding error with tests. Switched AI models when a new one misread long receipts.

CSM Assistant | Claude API, internal tool Mar 2026 - Present

- Built a private tool with the Claude API that turns client call transcripts into follow-ups, tasks, pain points, and churn signals, with a memory for each client.
- Saves **45 min** per client call. Flagged **5+ churn risks** early and shared **50+ pain points** with product.

Reddit Pain-Point Miner | Python, Claude API Mar 2026 - Apr 2026

- Built a tool that ranks product opportunities from real Reddit complaints, with evidence quotes and willingness-to-pay estimates.
- Found that comments hold the real signal, not post titles, and rebuilt the data pipeline around that.

Showup | Built with Claude, not yet launched Oct 2026 - Present

- Designed and built a gym habit app with XP, streaks, and small squads, with a built-in feedback board to guide what to fix next (showup-eight-sigma.vercel.app).

Settlemap | Built with Claude, in progress Oct 2026 - Present

- Building a phone-first map of where you can get to in X minutes by walking, biking, driving, or transit. **627 automated tests** passing. Chose not to scrape rental listings because the site's terms forbid it.

Road Network Data Discrepancy Resolution | Data Analysis, Process Improvement Nov 2024 - Dec 2024

- Reprocessed 2019 road condition data with 2024 algorithms and built a multiplier (**90%** confidence interval) to compare results. Multiplier was standardized across the organization.

B2B Sales Prediction for Champo Carpets | Machine Learning, Python Sep 2023 - Dec 2023

- Predicted order conversions with Random Forest and Logistic Regression, and forecast sales with Prophet to guide inventory planning.

SKILLS

Product: Feature discovery, Requirements and user stories, Backlog input, UAT, Agile ceremonies, Roadmap prioritization, AI feature evaluation

Customer: Client-to-product translation, QBRs, Renewals and expansion, RFP support, Executive stakeholders

Data and Tools: SQL, Python, Excel, Jira, Asana, Salesforce, ChurnZero, GIS

Building with AI: Claude, Claude API, Claude Code, Vercel, automated testing

EDUCATION

Master of Engineering, Industrial Engineering Sep 2022 - Apr 2024
Concordia University, Canada

Bachelor of Technology, Mechanical Engineering Aug 2017 - Jul 2021
MIT World Peace University, India

CERTIFICATIONS

- CAPM (Certified Associate in Project Management)

AWARDS

- Culture Award, Citylogix Inc, 2025
- Top Employee, Scon Projects, for process improvement that raised delivery speed **30%**
